

DISPO VAN[®]

SINGLE USE SYRINGES

Most Trusted Brand of India

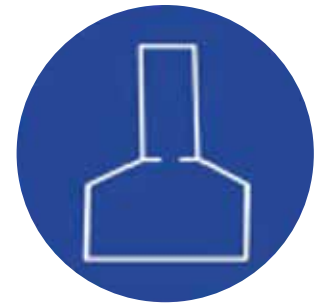

STERILE SINGLE USE SYRINGES

Dispovan single use hypodermic syringes is the largest selling single-use syringes in the Indian market. This sterile hypodermic syringe for single use is manufactured as per IS:10258/ISO:7886-1 (Sterile Hypodermic Syringe for Single use) for normal use. Furthermore, this 3-piece syringe has a special inert Piston which minimizes chances of leakage. It also has a shelf life of 5 years.

COMPONENTS

BARRELS AND PLUNGERS:

Made of non-toxic, medical-grade polypropylene compatible with the medication for short term contact drug delivery application. It comes with a luer mount nozzle with a 6% luer taper as per ISO - 80369-7

PACKING: DISPO VAN single use syringes are individually Ribbon packed in a robust double-laminated plastic film. Ribbon packaging is superior to blister packaging due to higher puncture and water resistance, enabling extended shelf-life under adverse conditions. But for enabling optimum container loadability it is also available in transparent thermoformed peelable Blister pack with medical grade paper.

GASKETS:

Made of natural rubber or thermoplastic elastomer which is chemically inert and compatible with medications for short term contact, drug delivery applications and for ensuring smooth movement of plunger.

THE STERILE HYPODERMIC SYRINGES FOR SINGLE USE ARE PREFERRED FOR THE FOLLOWING REASONS:

- Manufactured on highly automated machines with vision inspection.
- Prevent the spread of blood-borne infections and illnesses.
- Mass-produced, allowing greater accessibility and easy availability, meeting any urgent requirements.
- Do not require cleaning or sharpening, leading to low-maintenance costs.
- Affordable and widely available.
- Cannula made with premium stainless steel and engineered for a conical and sharp bevel ensuring comfortable insertion.
